The CHAIRMAN said—Gentlemen, before promeding with the resolution I would say a few words. I refer to the statement that his been in your hands for the last fortnight. Abording to this the capital account amounts to \$51,725, consisting of 240 paid up shares = 36,000; the original instalment of 33 per share on 3,760 stares. \$30,030, and the first enti-paid on 2,235 shares, at '\$7.-\$15,645 making altograther. \$51,725. To cover these loans and continue the business it would be necessary to call in the remainder of the capital, but as several influential shareholders have expressed their wish rather to wind up the business than to put more capital into Borneo, we have convened this meeting in order to decide what is to be done. The CHAIRMAN—The meeting was convened by the general managers and not on account-of any written requisition, but shareholders have amilied to the general managers verbally. Mr. Ho Fun said that under Ordinance I: of 1865 the General Managers could only call an ertraordinary general meeting on a written application by three or more shareholders holding not less than one fifth of the shares. The CH IRMAN said the application of the

IMPERIAL QUARTO. INGLISH AND CHINESE DICTIONARY. WITH THE PUNTI AND MANDARIN

Pronunciation. An Anglo-Chinese Dictionary, published at the Daily Press Office, Hongkong. For comprehensiveness and practical service this Work stands unrivolled. All the new 1412 words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are notice, but the ranges will be open for Practice here given in extense. Each and every word is for students of a most instructive nature. Both the Court and Punti pronunciations are given the accents being carefully marked on the best principle hitherto attained. The typography displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast economy of

space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretolore characterized Chinese publications. To illustrate the vast scope of the work the following facts are submitted for consideration :— Chalmers' Vocabulary contains about 16,000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and unwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely requires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as

many as any other Dictionary hitherto pub-

For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English communicate effectively with natives who inderstand nothing but Chinese. In this respect the work will be found indispensable to all Europeans residing in China, and to the natives homselves it explains subjects fully with which. very few indeed of them are perfectly acquainted. To parties resident in England and interested in China it cannot but be invaluable occasion-

It comprises upwards of two thousand large 4. Ŷols. Imperial Quarto, Price. \$20. A Large REDUCTION in PRICE is made to Purchasers of SIX or more Copies. LONDON: TRUBNER & Co., 60, PATERNOSTER ROW.
